

As a movement we hope to witness the Maltese political class develop one of the most advanced democratic systems in Europe. A 'Maltese Polis' at it's best, right in the heart of the Mediterranean, where our smallness is transformed into the greatest advantage. A country which is democratically advanced thanks to above average levels of participation by the people.

We also hope to see Malta take up more of a leadership role within the European framework as a prototype model of democratic excellence. As a movement we do support governments and members of parliament who work in favor of progress and the improvement of the the local democratic system.

Let's take the example of Dr.Franco Debono, we believe that even though his methods are debatable, the essence of this MP's message is valid. As part of the movement we support many of his proposals and we believe that this member of parliament has content which is worth taking into consideration. Beyond partisan feuds, we believe that anyone who is in power should take note and act upon his proposals, in the interest of the nation and of democracy - even though, we are aware that his methodology is debatable.

If you agree with our line of thought and do also hold the ambition of developing one of the most advanced participatory democracies in Europe. Join us via the focus group which works on the strengthening of the local democratic system or keep in touch with us via the website www.progress.org.mt, the email address contact@progress.org.mt or alternatively the cell phone number +356 999 777 78.
