

As a movement we are in favour of national unity. Whilst understanding that various Maltese and Gozitan citizens have been through experiences which were socially and politically divisive... we do also believe that the time has come to look forward to a future which unites us. As part of the movement we look forward to the day when all Maltese citizens will feel comfortable enough to attend for Independence Day celebrations as well as Freedom Day. We believe the latter because "before we are Nationalists or Labourites, we are first and foremost - Maltese Citizens."
